## **RE: Thermage Cellulite Clinical Trial (16.0)**

Dr. Bill Johnson, in Dallas, Tx, would like to perform a clinical trial using the new 16.0 tip for the instantaneous reduction in cellulite in stage 2 cellulite patients. Dr. Johnson and Innovations Medspa would like to request from Thermage, 12x 16.0 Thermage tips for the use in this in-house clinical trial.

### **OBJECTIVE**

Show an instantaneous reduction in cellulite in stage 2 cellulite patients with the new Thermage 16.0 procedure. Areas to be treated are both back thighs. The clinical trial will hold 6 carefully selected patients that will be treated in the same manner and recorded for authenticity. The goal is to collect data to support an instant reduction in cellulite by using the Thermage procedure, specifically the 16.0 Tip. We have chosen the 16.0 tip because it is new and very fast to do. If our hypotheses are correct, we aim to prove that there is a cellulite procedure that can be done in 1.5 hours, one treatment, and can show instant results. Though the main goal is to show an instant change, Innovations Medspa will also monitor change over a 6 month period.

### **BENEFITS**

Any data collected will be shared with Thermage for use in marketing and product development. Video and news coverage will also be shared for marketing purposes and physician training.

**\*Innovations Medspa is scheduled to perform a LIVE Thermage 16.0 for cellulite on ABC in March.**
